

This powerful Chess program for Windows is very intuitive and easy to use . Some of its features are

- 1)It allows Chess board to be saved and continued play later
- 2)It allows arbitrary setup of the Chess board, which is very helpful for learning the game and play some of the famous games.
- 3)It uses simple chess notation like **A5-D8** instead of **Nf3 Nc6** for movement of pieces
- 4)The Chess board can be easily enlarged if needed

This is the screen when program starts

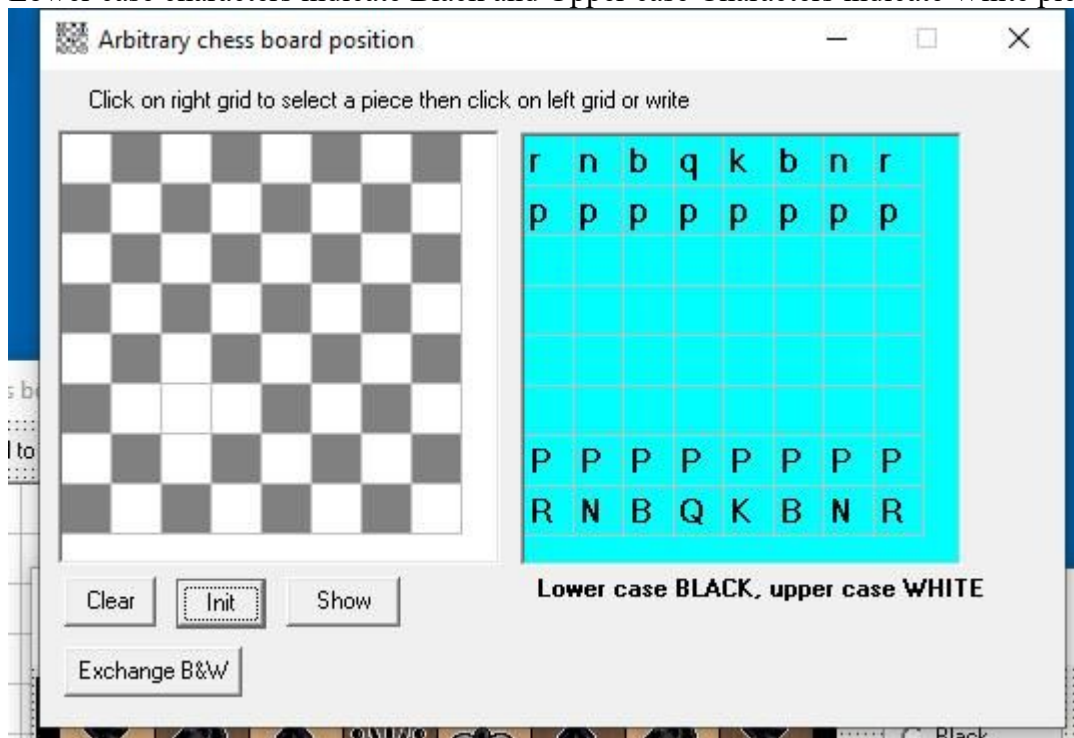

There are 4 modes of play as you see on top right box . White position can be on top . The higher Search dept makes computer think longer exponentially .

A Chess file can be opened

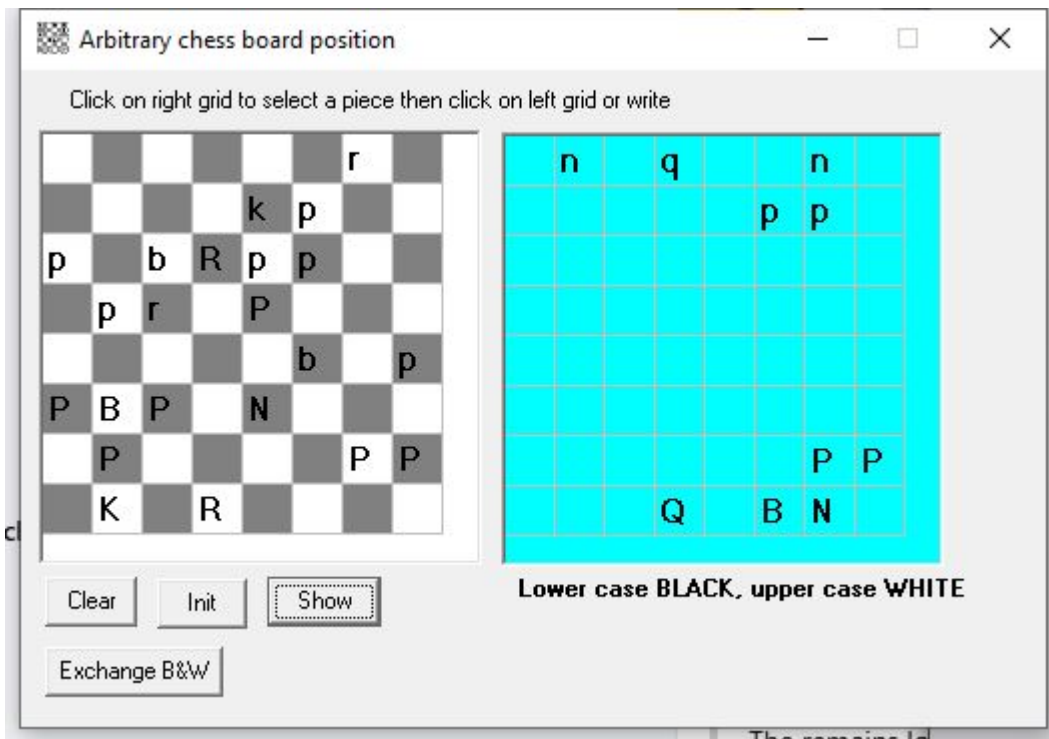

To setup an arbitrary chess board like for playing famous Chess games click on Setup-brd and you will see this screen. Lower case characters indicate Black and Upper case Characters indicate White pieces

For example to setup this game

You will click on a piece on the right and then click on a square on left. No need to hold the mouse like drag and drop

Click the show and you will see

I hope you will be enjoying playing this Chess software. You can contact me by email motahed1@yahoo.com , my wechat is **motahed1**

Good luck
